CAREER OBJECTIVE

A Electronics & Communication Engineering undergraduate with a strong technical foundation and excellent verbal and written communication skills. Passionate about real world problem-solving and interpersonal skills in a customer-centric BPO or Technical Support role. Proven ability to work under pressure, manage team dynamics, and explain complex technical concepts in a simple, user-friendly manner.

EDUCATION

B.Tech in Engineering(3rd Year)

2023-2027 (Expected)

Arya College of Engineering, Jaipur (RTU, Kota)
CGPA : 7.5 / 10 (till 4th semester)

RESEARCH INTERESTS

- Backend Development and APIs
- Robotics and Automation Systems
- Mechatronics and Sensor-Based Systems
- Engineering Solutions for Real-World Problems

PROJECTS

Social Media Application (React.js & Node.js)

(Ongoing)

- I am working on a social media web application using the MERN-Stack .
- It is Designed as a microblogging and edutainment platform where users can share problems, ideas and learning content .
- Users can sign up, log in, create posts, and share content on the platform.
- This app also supports audio and video calling between users.
- Through this project, I gained a clear understanding of how frontend & backend work together in a real application.

Mechanical 3D Ventilator System

- Designed a low-cost mechanical ventilator for emergency respiratory support.
- Focused on mechanical movement, safety considerations, and cost-effective design.
- This project was aimed at use in low-resource medical environments.
- Through this project, I gained hands-on experience in mechanical systems and practical problem solving.

Object Detection Drone

- Built a drone using KK2.0 flight controller for stabilization.
- Used sensors to detect obstacles and respond accordingly.
- Integrated sensors input with motor control logic.
- Through this project, i gained hands-on experience in basic drone systems and automation.

Technical Skills

Programming Languages : C, C++, Python, JavaScript(ES6+), HTML5, CSS3

Frameworks & Libraries : React Native, React.js, Node.js, Express.js

Databases & Tools : MongoDB, REST APIs, Git, GitHub, MS Excel, VS Code,
Android Studio

Styling & UI : NativeWind / Tailwind CSS, React Native Paper

Real-time & Media : Socket.io (Real-time data), Web RTC or Peer.js (Voice/Video Call)

State Management & Architecture : Redux Toolkit, Redux Persist, REST APIs

- BPO & Support Skills : Customer Support, Technical Troubleshooting, Problem Resolution, Active Listening, Client Communication.

Achievements

Geospatial Hackathon **(2025-26)**

- Inter-college level Hackathon : Built a Full stack solution for Offline Navigation using React.js & Node.js .

Smart India Hackathon (SIH) **(2024-25)**

- Shortlisted among the Top 20 teams in Smart India Hackathon (SIH) 2024 for developing a practical solution.

Smart India Hackathon (SIH) **(2023-24)**

- Shortlisted among the Top 10 teams in Smart India Hackathon (SIH) 2024 for developing a practical solution.

Hack AryaVerse **(26th-27th April 2025)**

- Participated in Hack AryaVerse, a college-level hackathon focused on problem solving and rapid prototyping.
